

Problem Solving Inspiration in Three Financial Capitals

Our exciting new Maths programmes to London, Paris and New York offer Maths groups educational experiences that will enhance students' classroom studies. WST's vast experience in creating popular study trips to all three destinations enables us to fulfil your learning objectives in these fantastic cities and provide a truly enjoyable tour. Having won 'Best Customer Service' at the British Youth Travel Awards in 2015 and as the only school tour operator to hold the Customer Service Excellence Award, we can truly be trusted.

London - Multiple educational opportunities

London has a lot to offer Maths groups across all ages of secondary school and sixth forms. Excellent educational visits include the brand new Mathematics Gallery at the Science Museum opening later in 2016, curriculum linked museum sessions and themed walking tours! Let us create your perfect trip.

TEACHER'S TOP VISITS

The David and Claudia Harding Gallery at the Science Museum - New

This gallery will tell stories that place Maths at the heart of our lives, exploring how mathematicians have helped to shape the modern world.

Mathematics is brought to life through the gallery's design and architecture and mathematical concepts will be incorporated into the form of the display cases and other aspects of the gallery. Objects range from intriguing hand-held mathematical instruments to a 1929 experimental aircraft.

KERRIE BILSON OUR LONDON SPECIALIST

Kerrie's experience in creating educational tours and her knowledge of London means your trip will be well planned, relevant and hugely enjoyable.

"I think the greatest strength of WST is the staff you have working for you. Kerrie Bilson is the person I have always dealt with and she has always been absolutely excellent."

Matthew Arnold School, October 2015

KERRIE'S TOP TIP

There are different visit options for groups depending on their key stage and also main areas of interest so let us know and we'll suggest the most suited trip.
